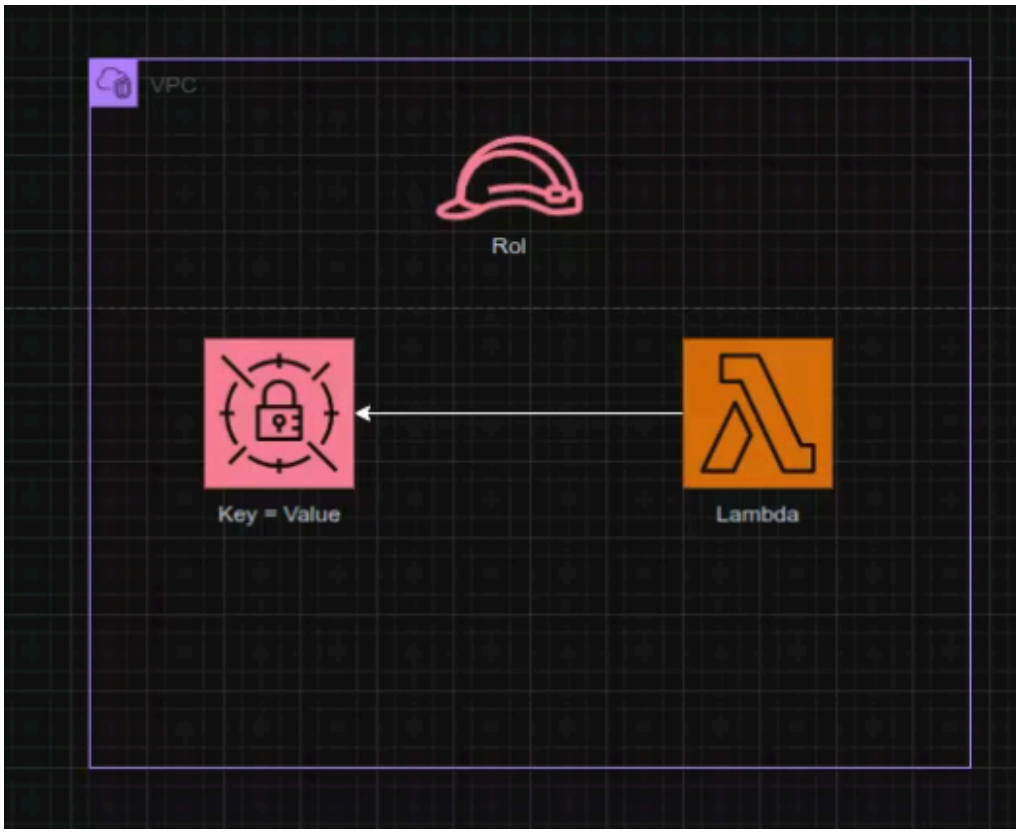
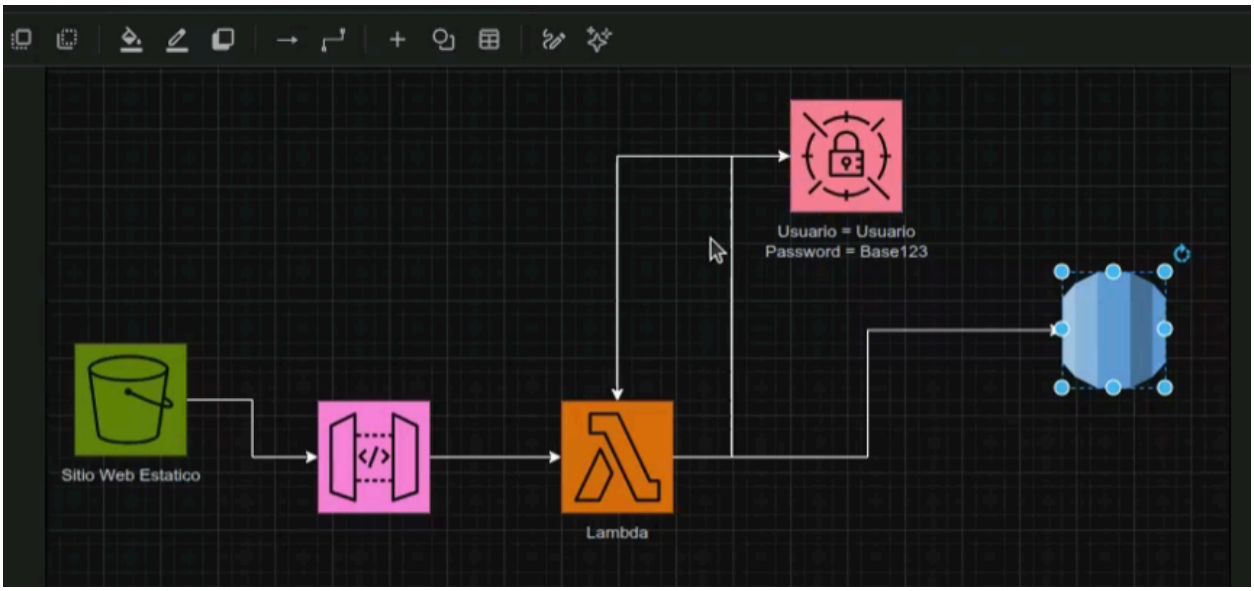
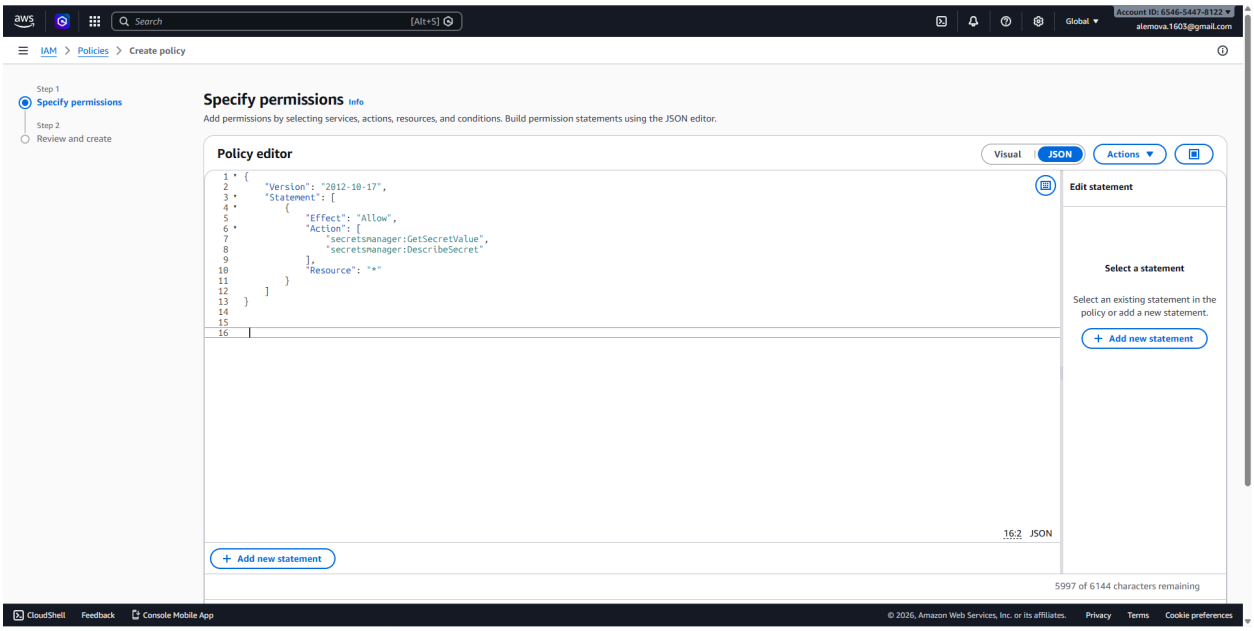
Evidencia AWS Lambda - 06/03/2026

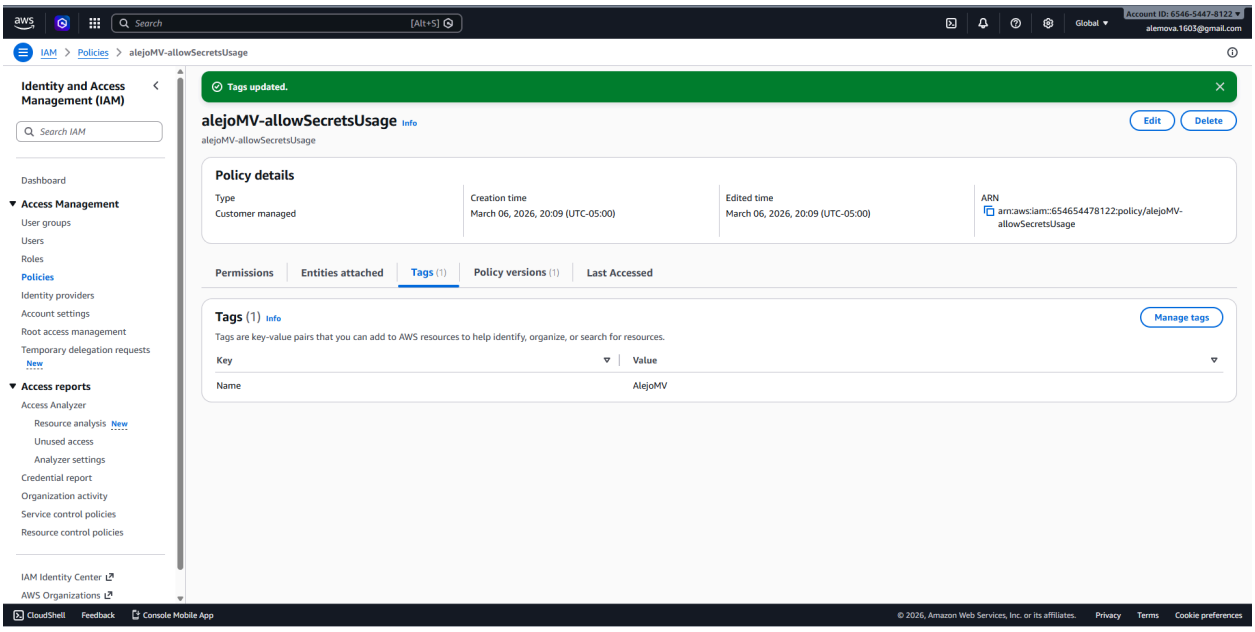




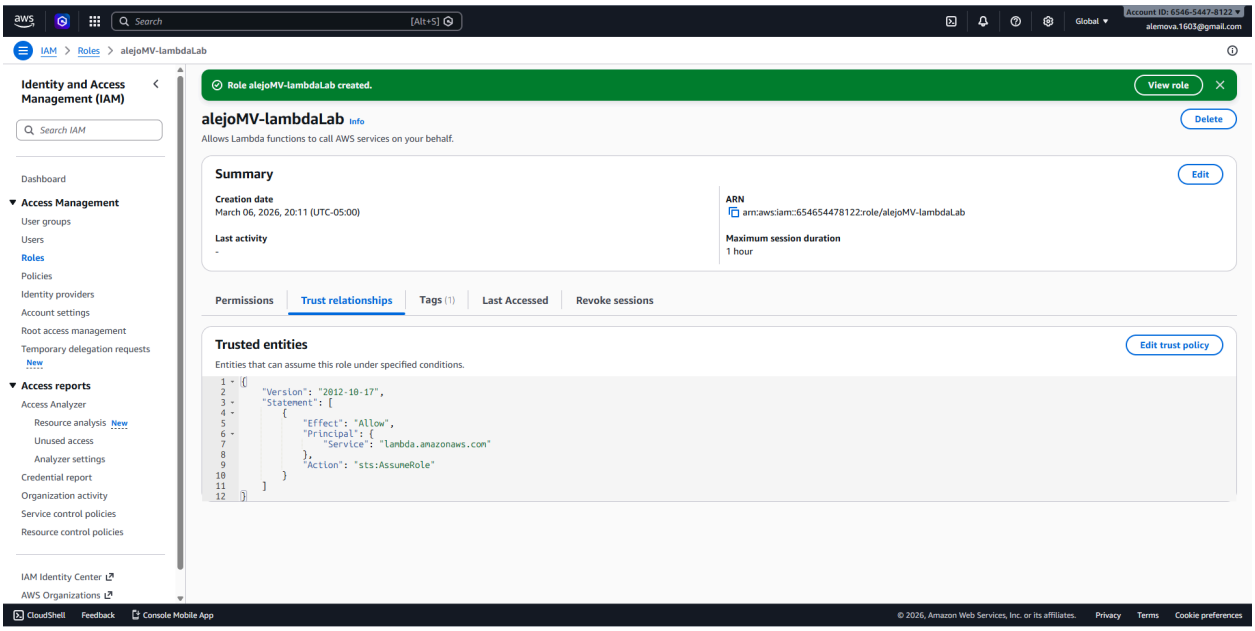
1. Creamos una política

Esta va a ser usada en un rol para lambda.

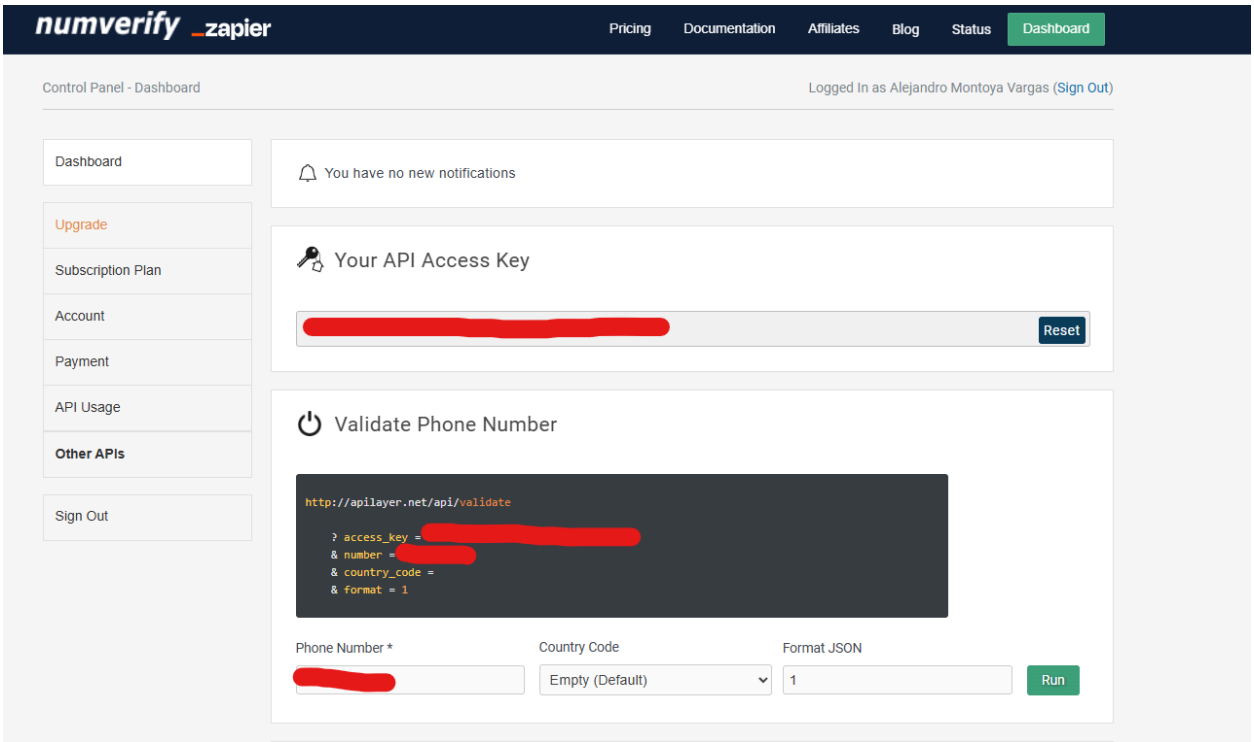




2. Creamos un rol con la política asignada

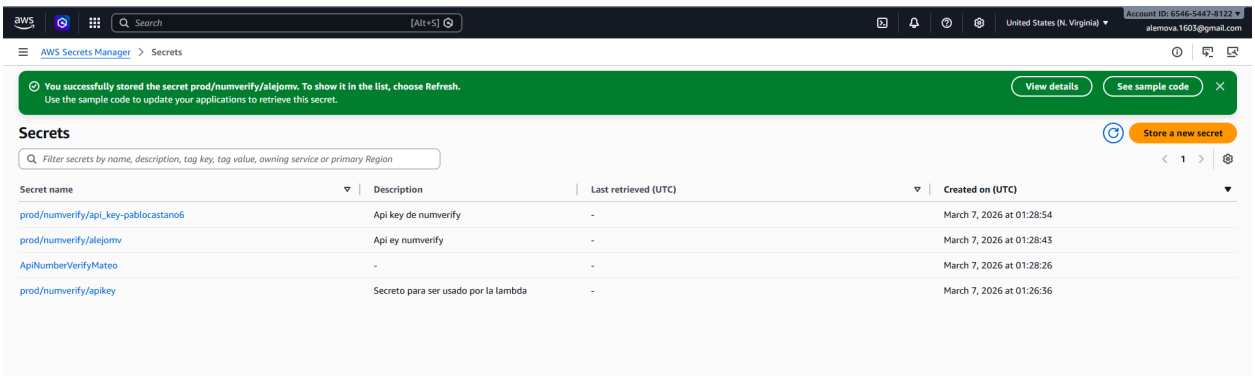


3. Nos registramos en numverify

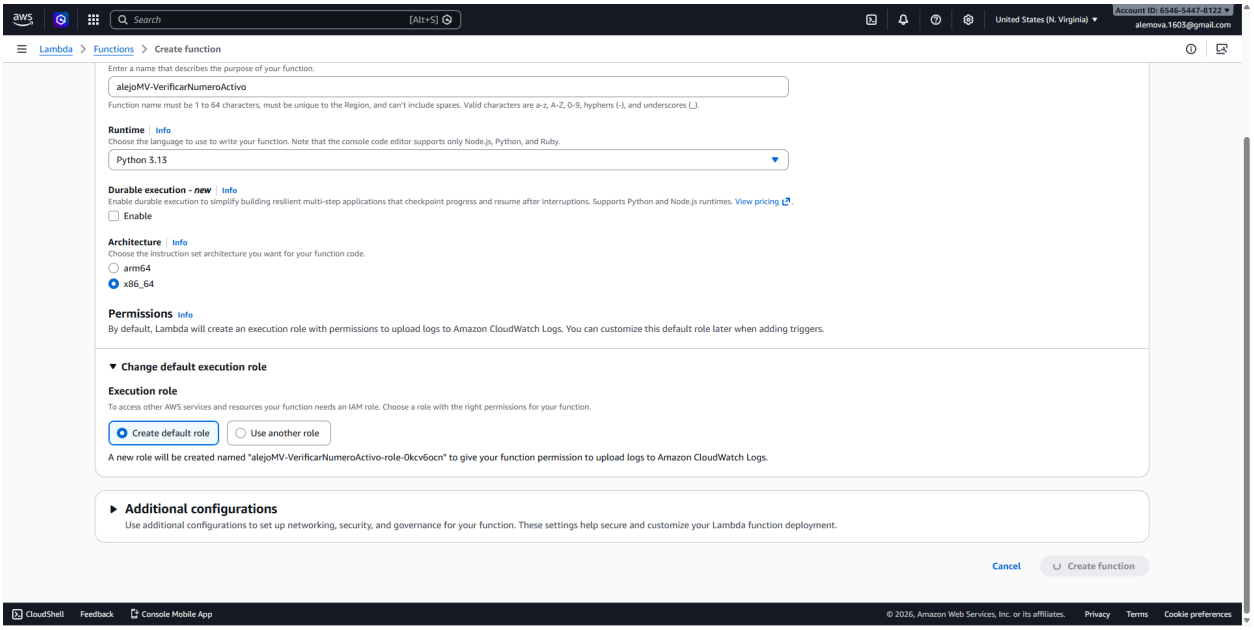


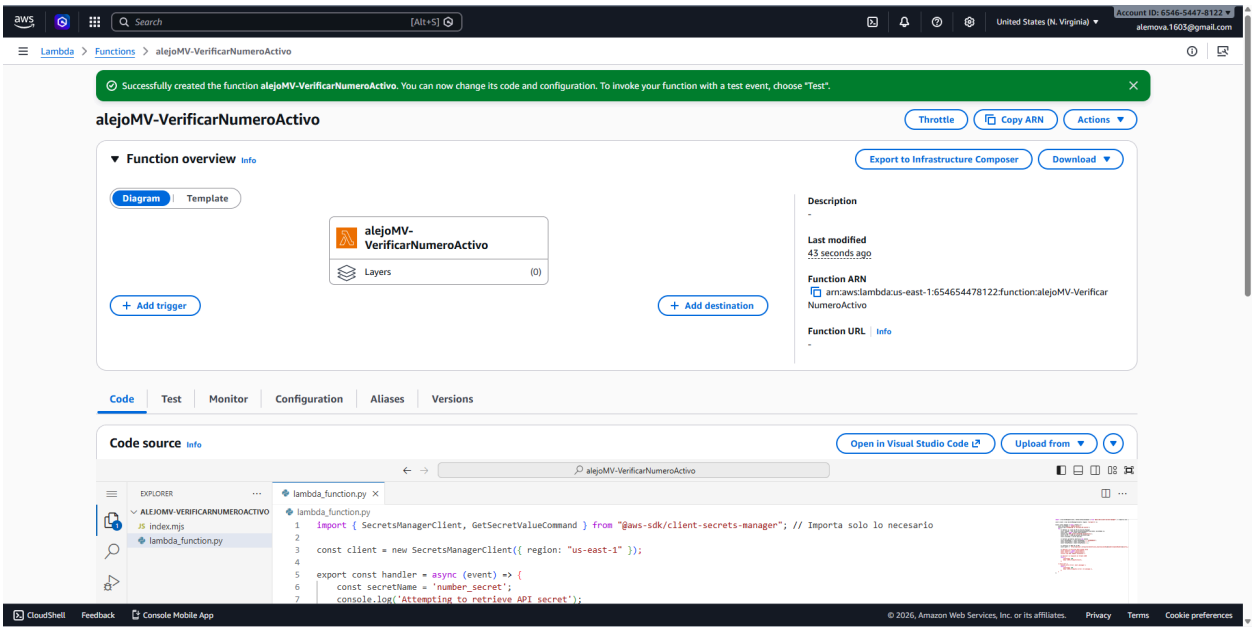
3. Creamos un secreto

- Este va a contener las variables de ambiente(API Key) de numverify.
- Nombre: prod/numverify/alejomv
- Los secretos solo se pueden eliminar después de 7 días.

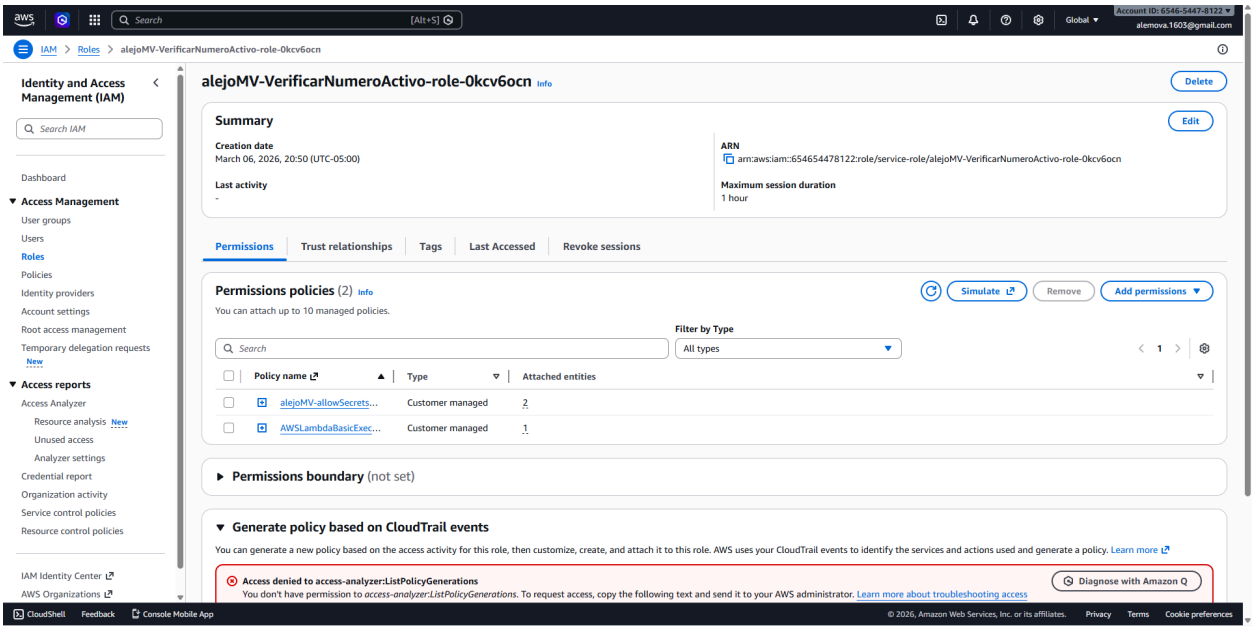


4. Creamos la lambda





Añadimos el permiso de acceso a secrets manager



Creamos un test y lo probamos

Test event Info

Delete | CloudWatch Logs Live Tail | Save | Test

To invoke your function without saving an event, modify the event, then choose Test. Lambda uses the modified event to invoke your function, but does not overwrite the original event until you choose Save.

Test event action

- ○ Create new event
- ◉ Edit saved event

Invocation type

- ◉ Synchronous
  Executes the Lambda function and blocks until receiving the function's response, with a maximum timeout of 15 minutes. Returns function output or error details directly to the calling application.
- ○ Asynchronous
  Enqueues the Lambda function for execution and returns immediately with a request ID. Function processes independently, with results optionally sent to a configured destination like SQS, SNS, or EventBridge.

Event name
