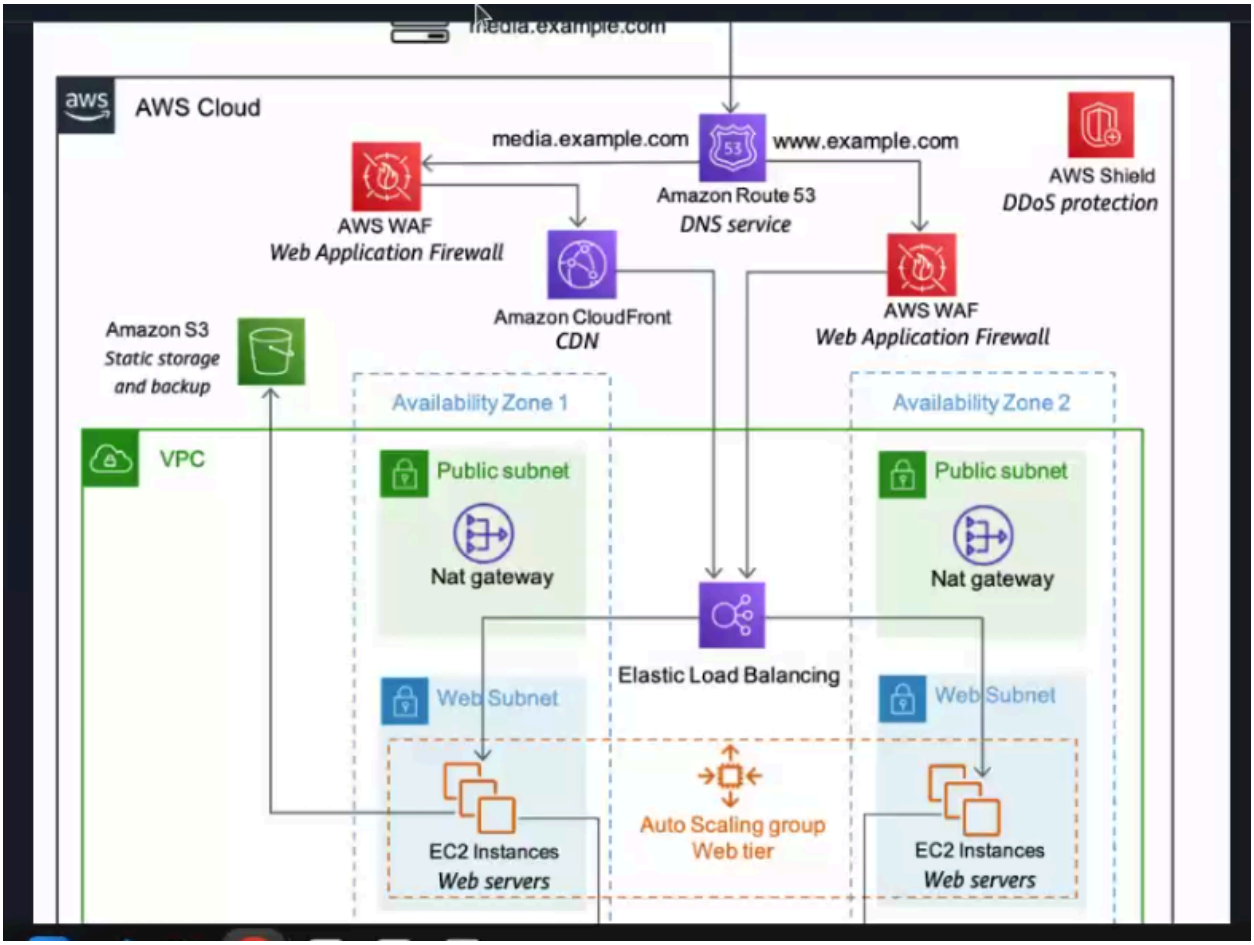
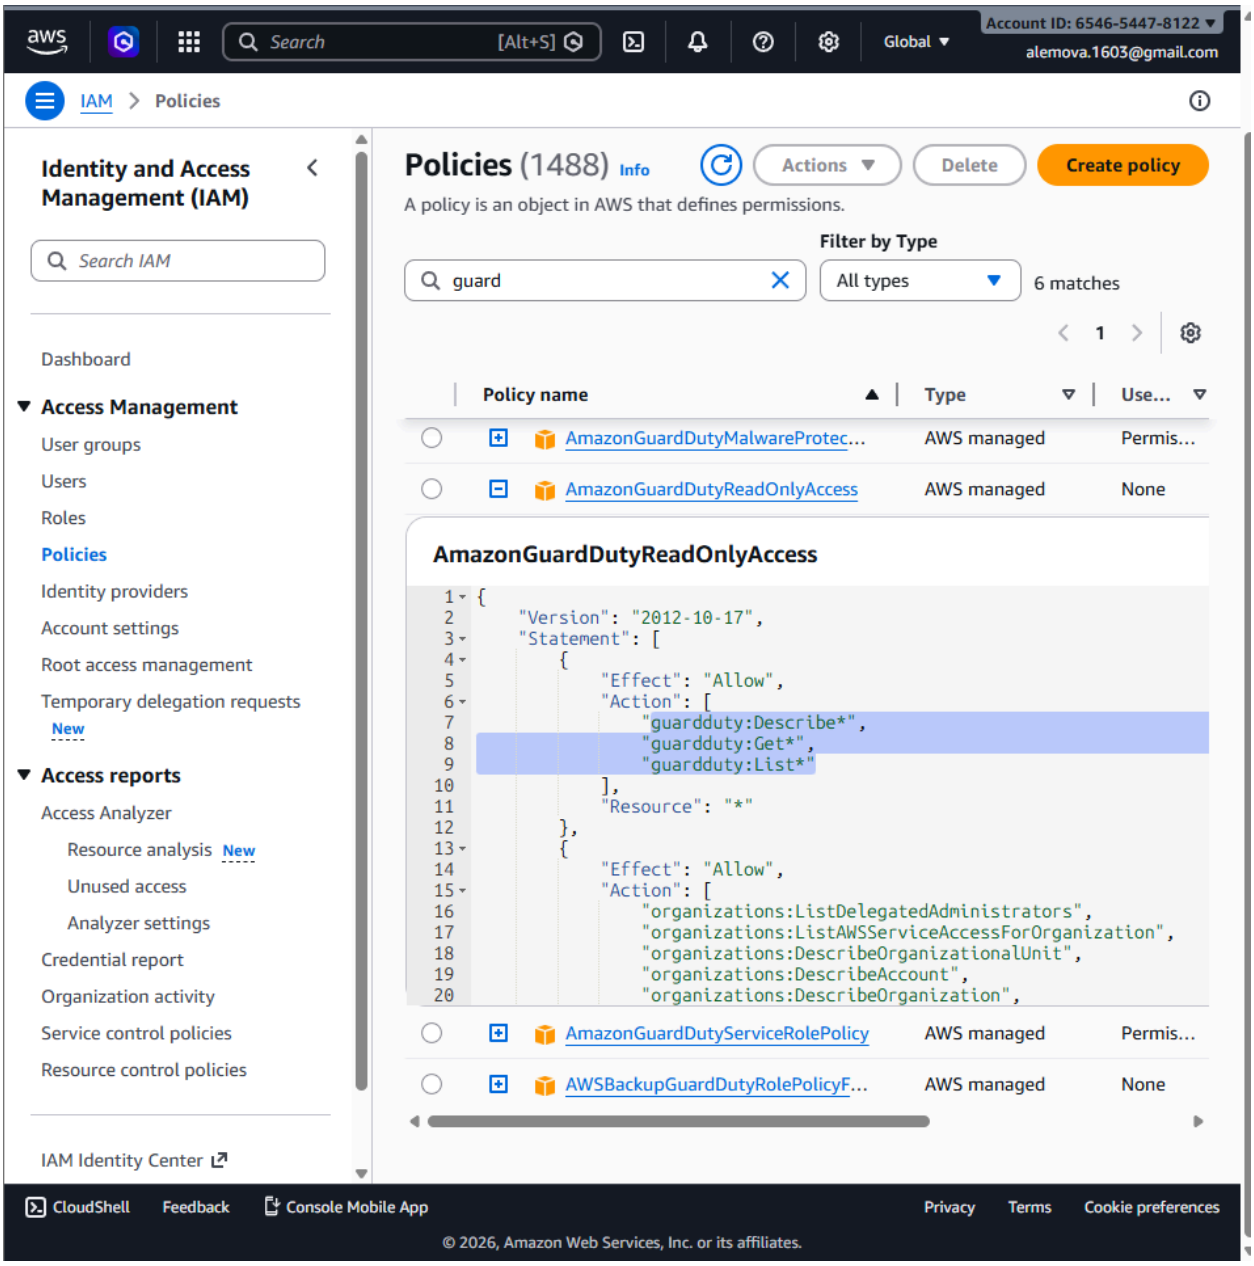
Evidencia - Seguridad 2 - 23/02/2026



Antes de nada, vamos a darnos permisos a través de IAM



Estos son los permisos que el profesor nos dará a través de terraform

Y así, tenemos acceso a guard duty

1. GuarDuty

Revisar vulnerabilidades en lambdas, ec2, contenedores, s3, rds y malware → **DETECTAR ACTIVIDADES MALICIOSAS EN VIVO.**

Security Hub New
Introducing the new AWS Security Hub
The new Security Hub is your unified cloud security solution featuring prioritized risk detection, central management of Security Hub CSPM, GuardDuty and Inspector, and attack path visualization. It also offers cost optimization through unified pricing across security services.
